

## Turtle Tapa

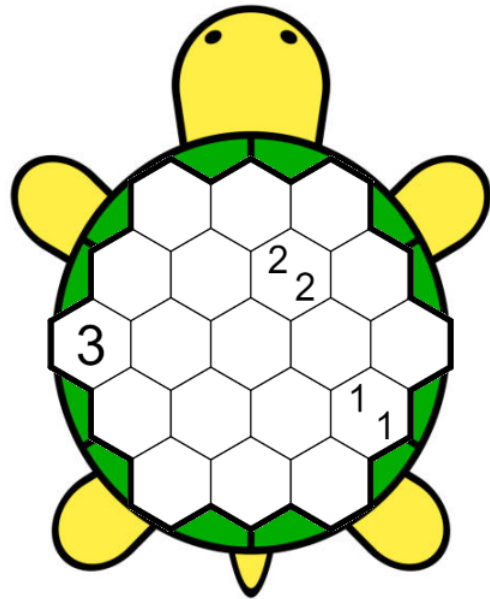

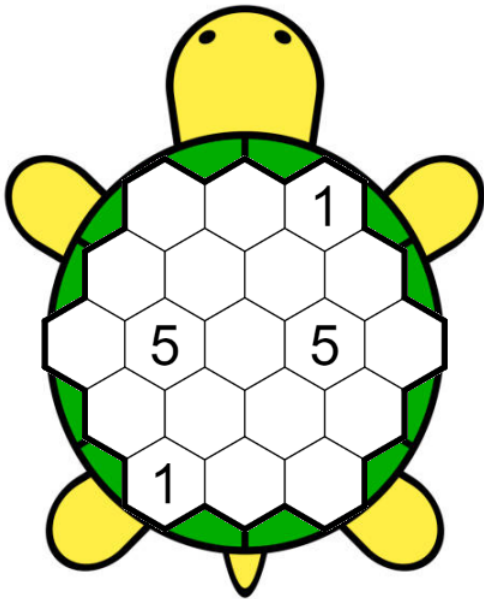

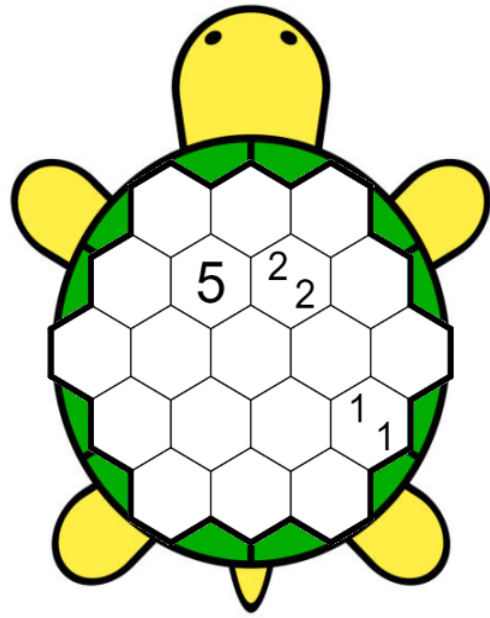

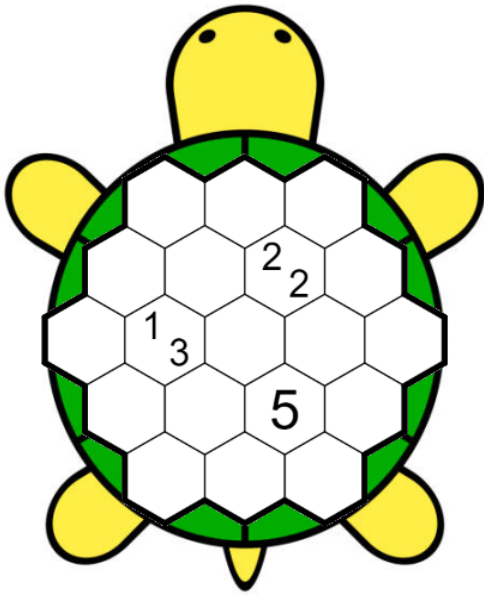

**M**ake way for the turtles! Caltech's Turtle Pond is home to numerous turtles and the occasional duck or two. Help shade in the correct scales of the turtles below to spell out your next stop.

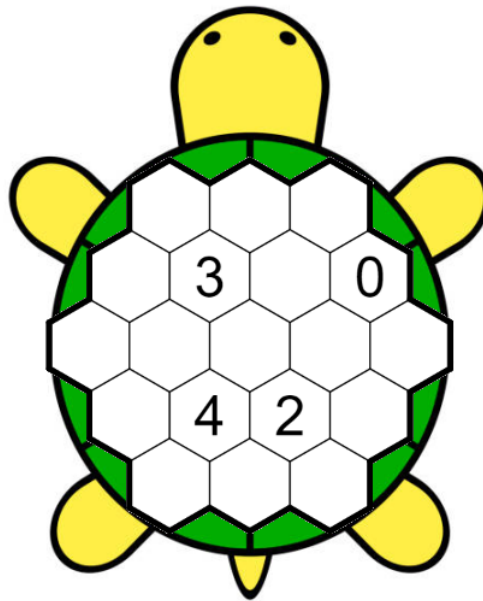

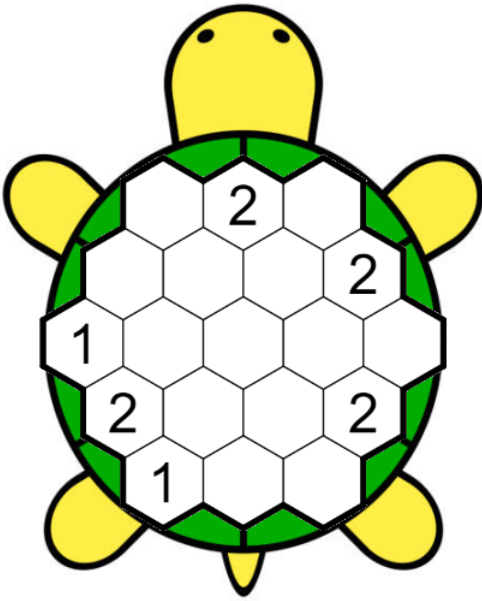

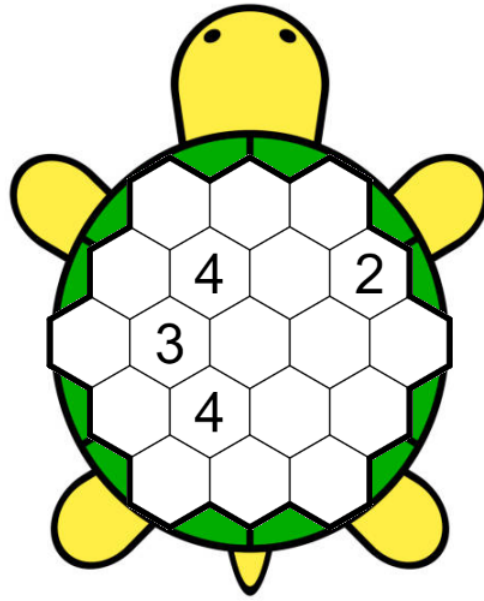

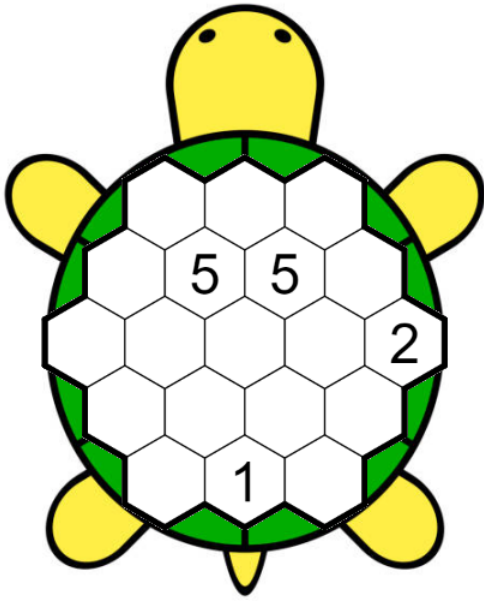

Shade some cells so that all the shaded cells form one connected area. Clues cannot be shaded and represent the lengths of the blocks of consecutive shaded cells in the (up to) six cells surrounding the clue. Cells that are not adjacent to clues may be shaded. No three pairwise-adjacent cells may be shaded.

**IMPORTANT: PLEASE DO NOT FEED OR TOUCH THE ACTUAL LIVING TURTLES.**

**Example:**

-----
