

Delicious Dilemma

Location Answer: Red Door

Puzzle Answer

- Brian, Broad, beef dip, orange juice, large
- Ryan, Red Door, pork sandwich, lavender lemonade, medium
- Ritvik, Browne, margherita pizza, Earl Grey tea, small

Solution:

By clue 6, the pork sandwich goes with either the medium drink or the large drink.

Assume the pork sandwich goes with the medium drink.

- Clue 6: The small drink is served at Browne.
- Clue 1: Brian eats at Broad.
- Clue 2: Brian's drink is large.
- Clue 4: The small drink is Earl Grey tea.
- Clue 2: The pork sandwich belongs to Ryan or Ritvik, hence is served at Red Door.
- Clue 2: The margherita pizza is served at Browne. The beef dip is served at Broad.
- Clue 3/7: The medium drink is lavender lemonade and the large drink is orange juice.
- Clue 3: Ritvik eats at Browne.
- Brian, Broad, beef dip, orange juice, large
- Ryan, Red Door, pork sandwich, lavender lemonade, medium
- Ritvik, Browne, margherita pizza, Earl Grey tea, small

Assume the pork sandwich goes with the large drink.

- Clue 6: The medium drink is served at Browne.
- Clue 1: Brian eats at Broad.
- Clue 2: Margherita pizza is served at Red Door.
- Clue 7: Either Earl Grey tea or orange juice is the large drink.
- Clue 5: Earl Grey tea is the large drink.
- Clue 4: Brian's drink is the small drink, which is either lavender lemonade or orange juice.
- Brian does not eat the pork sandwich (wrong drink size) or the margherita pizza (wrong cafe), so Brian enjoys beef dip.
- Clue 1: Beef dip is served at Broad, so the pork sandwich must be served at Browne, contradicting drink size.

Thus, the pork sandwich must go with the medium drink.
